

Year 5

Spring Term Two Homework Project

The Alps

It is time to get creative year 5.

I would like you to use materials that you have at home to make one of the following:

1) Research contour lines on a map. Use this idea to build a mountain, each layer representing a contour line.

2) Make some "Top-trumps" cards about mountains of the world.

3) The year is 1938. As a member of team to make the first ascent of the north face of the Eiger, write a recount of your expedition.

Or complete a homework task of your choice relating to the Alps.

This is your chance to really amaze and impress your peers and your teacher.

I look forward to seeing your amazing projects by **Monday 25th March.**
